The Project Objective :

Our main idea is to make website to facilitate for all students who take courses from different levels to search their registered courses and then add them then the final schedule including these courses will be generated to downloaded.

Our code link on github : https://github.com/RanaMohamed122/Scheduling_Website
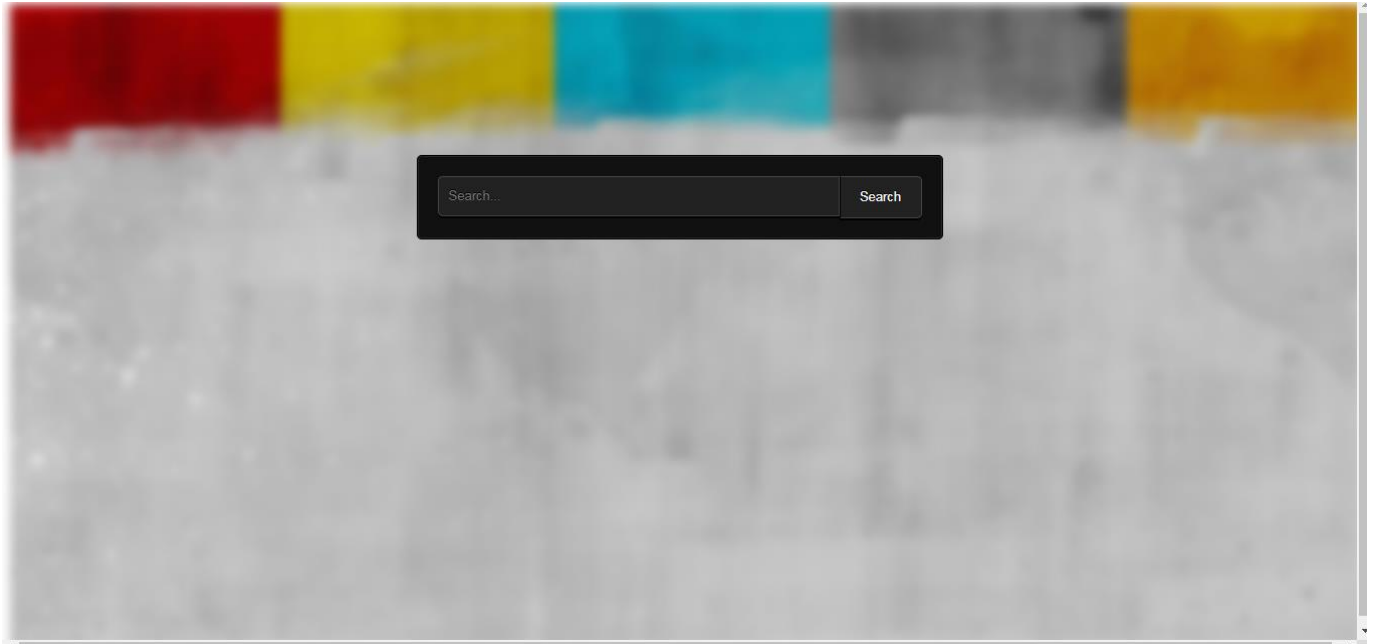

Our website initial design :

It will consist of Three pages one is home page , in this page the user can sign in / sign up to redirect the second page .

Here is a screenshot of our first page :

Our second page is search page which the student will search his registered courses and add them to generate his own schedule .

The third page is a demo for the design of the schedule that will be generated
